tanchou.fr | github.com/Tanchouteur | linkedin.com/in/louis-tanchou

Computer science engineering student at ENSIIE and software and FPGA apprentice at EDF R&D. I develop tools for industrial testing and build personal projects across web applications, APIs, automation and Linux infrastructure.

RELEVANT EXPERIENCE

EDF Research & Development

September 2025 - Present

Software and FPGA Engineering Apprentice

- Develop software tools for industrial testing, from data acquisition to presentation.
- Contribute to FPGA-based digital systems within the testing team.

Les Lapins du Gapeau

August 2026

Volunteer Web Developer

- Built and delivered a website with Astro, TypeScript and Decap CMS; deployed it on Cloudflare Pages.
- Enabled the owner to update site content independently through the CMS and two user guides.

Riner CarWash

Summers 2023 and 2024

Seasonal Site Supervisor

- Managed daily operations, accounting, equipment upkeep and inventory at a customer-facing site.

SELECTED PROJECTS

SpotiSort Python, FastAPI, Spotify API, Gemini, Docker

Built a playlist-sorting workflow with validated AI output, resumable jobs and encrypted user credentials.

Menu de la Semaine Next.js, TypeScript, PostgreSQL, Prisma

Built a meal planner that selects 14 meals under practical constraints and generates a portion-adjusted shopping list.

Nexus HomeLab Linux, Proxmox VE, Docker, Cloudflare Tunnel

Administer virtual machines and containers; publish services through Cloudflare Tunnel without opening router ports.

EDUCATION

ENSIIE - French engineering school

2025 - 2028

Computer science engineering program; degree expected 2028

IUT de Fontainebleau, UPEC

2023 - 2025

University studies in computer science

SKILLS

Languages Python, TypeScript/JavaScript, Java, C, SQL, VHDL

Web and data FastAPI, Next.js, React, Astro, PostgreSQL, Prisma

Systems Linux, Docker, Proxmox VE, Git, Cloudflare, FPGA

Spoken French: native; English: beginner, actively improving
